

THE KING'S SCHOOL

GRANTHAM

26 November 2021

To whom it may concern

We have been utilising the services of VerySafe UK since September 2020 as part of a strategy to minimise the transmission of the Covid-19 virus within the school. Their Nordic Chem antimicrobial coating was applied to all desks, chairs, and regular touchpoints such as light switches and door handles helping to ensure the safety of our staff and students. The Team were extremely knowledgeable about their product which is safe and effective.

Our Head of Biology observed that in a classroom experiment to analyse bacterial cultures was less successful due to the lack of available spores in the classroom following the application of the Nordic Chem antimicrobial coating.

The coating reduces the need for constant cleaning with harsh chemical and remains effective for at least 3 months. We have had the coating reapplied every 3 months since September 2020 and have just booked for the Team to visit again next month.

We believe that the Nordic Chem antimicrobial coating is reassuring for both staff and students, and is effective in helping us to minimise the Covid-19 risk in accordance with our Covid-19 strategy.

Please do not hesitate to contact me if you require more information about the use of this product in our school.

Kind regards,

Sue Gordon

Director of Finance and Estates

Head Master: Simon Pickett BSc
